

## MovieCD (PC CD-ROM) - Anime Release Checklist

A complete list of all 8 anime title releases and their 17 volumes and editions, with Sirius catalog numbers when available. MovieCD was an attempt by Sirius at introducing a unified computer video codec publishing standard made specifically for the Windows OS segment of the PC market. Unlike generic CD-ROM video releases, MovieCD used a proprietary codec that could only be played by using the player program software included on the MovieCD discs, or downloaded from the MovieCD website. Titles from both Central Park Media (*CPM*) and Manga Entertainment (*ME*) were released in this format.

---
